

# Roof Reviver (Tilewash)

## Product Information

Tilewash is a powerful contact cleaning solution for the removal of moss, moulds and lichens on most hard surface areas.

### SURFACE AREAS FOR APPLICATION

Concrete	Weatherboards & Walls
Tile Roofs	Decks
Terracotta Roofs	Wooden & Painted Surfaces
Translucent Roofs	Fibro Cement
Concrete	Ceramic Floor & Wall Tiles
Bricks and Blockwork	Asbestos & Supa 6 Roofs
Cobblestones & Pavers	(Warning - do not waterblast asbestos roof surfaces)
Paths & Driveways	

### PRODUCT FEATURES

- Cleaning Solution
- Diluted for Immediate Application
- pH 12.5 – 13.5

Colour	Clear, pale yellow, mobile liquid
Appearance when dry	Clear
Odour	Characteristic, Bleach odour
Storage	Store in original container. Keep upright in cool dry area. Keep lid on container when not in use.
Shelf Life (months)	12
Pack Size	20 L @ 4% concentrate

### APPLICATION PROCESS

Remove all dirt, moss, lichen, mould and all other surface contaminants using high pressure water blasting (min. 3000 P.S.I.). After completion and time to dry, apply "Roof Reviver" Tilewash to the roof using a suitable application method, ensuring complete wetting (saturate the surface but not to the point that the product starts to run) to kill remaining spores; after approximately 1 hour (preferably overnight) hose roof thoroughly with clean water.

Ensure surface is clean, dry and defect-free before proceeding with your "Roof Reviver" roof coating system.

### APPLICATION EQUIPMENT

Tilewash is recommended to be applied by pump driven or hand held equipment which can provide sufficient spray volume for thorough coverage and wetting.

Common application methods are;

- Air Assisted or Airless Spray units
- Backpack spray units
- Garden hand held spray units
- Hand held watering cans

### COVERAGE

Total surface coverage can be achieved by using 1 Litre of Tilewash per 8 m<sup>2</sup> of roof.

### CAUTION

Treated surfaces may become temporarily slippery; restrict traffic until dry.

Avoid discharging into streams and other aquatic habitats.

Avoid direct contact with grass & plants.
